EDUCATION

University of Texas Rio Grande Valley
Bachelor of Science in Computer Science

Edinburg, TX
2021 – 2025

TECHNICAL SKILLS

Languages: SQL, C++, Python, Java, R

Tools: MySQL, Excel, Tableau, Microsoft 365, Linux, Pandas, Git, Wireshark, Azure

Soft Skills: Problem-Solving, Quick Learner, Communication, Self-Sufficient, Teamwork, Organization

PROJECTS

Academic Performance Trend Analysis (*SQL, MySQL, Tableau, Excel*)

- Analyzed structured datasets simulating academic environments, including class performance, course drop rates, and reasons for student attrition
- Queried data using SQL to identify trends, patterns, and factors influencing outcomes
- Created dashboards and reports to visualize and communicate findings
- Performed data cleaning and transformation to prepare datasets for analysis

Voyage: Travel Itinerary Generator (*Figma, HTML/CSS, Python, Flask, PostgreSQL, APIs, GitHub, JavaScript*)

- Developed a full-stack web application that generates personalized travel itineraries based on user inputs (budget, location, dates, preferences)
- Integrated multiple APIs including Google Maps, Open-Meteo, Unsplash, and Gemini to enhance data-driven itinerary generation
- Designed and managed backend data handling using the Flask framework and PostgreSQL for database management
- Collaborated using GitHub workflows and designed UI/UX prototypes in Figma

TECHNICAL EXPERIENCE

Freelance Web Developer — McAllen Crime Stoppers (*2026*)

- Redesigned and rebuilt organization's WordPress website, improving functionality, navigation, and visual design
- Restored broken features including buttons, links, and mobile scalability from the previous incomplete build
- Collaborated directly with the organization to translate goals into design and functionality improvements
- Led a full website migration to a new hosting server, managed DNS, SSL, and WordPress setup with zero data loss

DoD Cyber Sentinel Challenge (*2025*)

- Participated in a Department of Defense cybersecurity competition designed to simulate real-world challenges in fields such as forensics, OSINT, networking, malware analysis, and web security
- Ranked in the top 25% of approximately 2000 participants
- Engaged with real-world cybersecurity challenges and developed an understanding of OSINT, networking, and system vulnerabilities
